Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/597,529	Applicant(s) MUSSCHEBROECK ET AL.	
	Examiner Sy D. Luu	Art Unit 2174	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. By merely describing a process, the claims fail to meet the standard format of claiming convention which should include matters such as a method with steps clearly defined, an apparatus or an article of manufacture. Appropriate corrections are required.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 5 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter, specifically a software application. Computer programs claimed as computer code per se, i.e., the descriptions or expressions of the programs, are not physical "things," nor are they statutory processes, as they are not "acts" being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed aspects of the invention which permit the computer program's functionality to be realized. In contrast, a claimed computer - readable medium

Art Unit: 2174

encoded with a computer program defines structural and functional interrelationships between the computer program and the medium which permit the computer program's functionality to be realized, and is thus statutory. See MPEP §2106 Section IV.B.1(a).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

6. Claims 1-6 are rejected under 35 U.S.C. 102(a) as being anticipated by Wugoski (US 7,421,654 B2).

As per claims 1, 3-4, Wugoski teaches a control device with an activity-based user interface for controlling a system with a renderer and multiple sources, wherein the renderer is configured for rendering content available from the multiple sources; the user interface provides a first set of user controls for control of the system in a first activity, and a second set of further user controls for control of the system in a second activity; characterized in that the control device controls switching the system from the first activity to the second activity upon detecting a validating user interaction with the user interface to validate the switching; wherein the validating user interaction comprises user interaction with a specific one of the further user controls of the second set, and wherein the validating user interaction comprises user interaction with a dedicated user input element of the user interface. (col. 2, lines 43-63; col. 8, lines 47 et seq.; col. 9, lines 23 et seq.).

Art Unit: 2174

As per claim 2, Wugoski teaches wherein the user interface comprises a touch screen display monitor for providing the first and second sets in different screens (col. 7, lines 60 – col. 8, line 15).

Claims 5-6 are similar in scope to claim 1, and are therefore rejected under similar rationale.
